SUMMARY

IT professional with hands-on experience in IT Service Management and a strong transition into Cloud and DevOps engineering. Skilled in designing and deploying production-ready infrastructure on AWS EC2 with CI/CD pipelines, Nginx reverse proxy, Vercel hosting, and Linux-based environments. Experienced in implementing server-level security, monitoring (Prometheus, Grafana), and automation using GitHub Actions. Focused on building scalable, secure, observable, and security-driven (DevSecOps) systems.

EXPERIENCE

Runtime Solutions — *I.T. Office Assistant*

Dec 2024 – Present

- Managed the complete ITSM ticket lifecycle, including incidents, service requests, problem management, and change management, while ensuring SLA compliance across 19+ **Nexus Select Trust malls**.
- Utilized ManageEngine ServiceDesk Plus to log, prioritize, assign, and resolve support tickets, ensuring timely issue resolution and high service availability.
- Collaborated with internal IT teams to troubleshoot and resolve hardware, software, network, and user access issues, minimizing operational downtime.
- Administered the IT asset lifecycle by maintaining accurate inventory, deployment, and documentation for desktops, laptops, printers, access points, and biometric devices.
- Created and maintained technical documentation, incident reports, and knowledge base articles to support daily IT operations and drive continuous service improvement.

Credence Infotech — *IT Service Management Consultant*

Feb 2022 – Oct 2024

- Delivered ITSM operations aligned with ITIL best practices, supporting incident, problem, and change management processes.
- Acted as a coordination point between technical teams and stakeholders to ensure smooth and efficient service delivery.
- Monitored service performance and maintained adherence to defined operational standards and client SLAs.
- Contributed to process improvement initiatives to enhance service efficiency and overall customer satisfaction.
- Provided operational support and consultation to improve IT service quality and system reliability.

PROJECTS

DevOps CI/CD Deployment with AWS, Nginx & Cloudflare

Project Link: kamleshprasad.com

- Designed and implemented a CI/CD pipeline using GitHub Actions to automate deployment of a React application.
- Deployed and hosted the application on AWS EC2 (Ubuntu) with proper server configuration.
- Configured Nginx as a reverse proxy and production web server for efficient request handling.
- Managed domain routing and DNS configuration using Cloudflare.
- Automated deployments triggered on every GitHub push using secure SSH authentication and GitHub Secrets.

Production-Ready Deployment on AWS EC2 with Monitoring, Security & Vercel

Project Link: onixmall

- Deployed a production-grade React and Node.js application using AWS EC2, Nginx reverse proxy, HTTPS via Certbot SSL, and Vercel for frontend hosting.
- Implemented server security using UFW Firewall, Basic Authentication, Nginx return 444, rate limiting, and initial DDoS protection strategies.
- Built a monitoring and observability stack using Prometheus, Grafana, and Node Exporter to track CPU, memory, disk, uptime, and network metrics.
- Integrated Trivy vulnerability scanning within CI/CD workflows to identify and classify security risks across dependencies and OS packages.
- Provisioned and configured virtual machines on Microsoft Azure, and deployed and hosted applications on Azure for cross-cloud deployment experience.

EDUCATION

Bachelor of Commerce (B.Com) — **University of Mumbai**

Jan 2022 – Mar 2025

Tilak Education Society's J.K. College of Science & Commerce

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, S3, IAM, VPC), Microsoft Azure (Virtual Machines, Hosting)
- **Operating Systems:** Linux (Ubuntu), Windows
- **DevOps Tools:** GitHub, GitHub Actions, Trivy
- **Web Server:** Nginx
- **Hosting & Deployment:** AWS EC2, Azure, Vercel
- **CI/CD:** Pipeline Automation, Continuous Deployment
- **Monitoring:** Prometheus, Grafana, Node Exporter, Datadog

- **Security:** SSL/HTTPS, UFW Firewall, Basic Authentication, Rate Limiting, Vulnerability Scanning
- **ITSM Tools:** ManageEngine ServiceDesk Plus

CERTIFICATIONS

- DevOps Complete Course Specialization — Packt
- Google AI Essentials Specialization — Google
- Career Essentials in GitHub Professional Certificate — GitHub
- Ubuntu Linux Professional Certificate by Canonical — Canonical
- DNS — Packt
